

**SENTO®**  
STAINLESS

*th* years

# COMPANY HISTORY

- 1999** Qinglian hardware machine factory was formally established, in the beginning, it only produced professional medical hand-washing device products under brand "SHUANG TAO"
- 2002** Sento Company upgraded the product system, and started the stainless steel faucet project and do the R & D, at the same time also push out 304SS faucets.
- 2004** Sento Company registered trademark "SENTO" for housing faucets. 
- 2005** After several years of research, the first stainless steel faucet was launched production on 6th August.
- 2006** Our 304SS housing faucets are warmly welcomed by the market once it was pushed into the markets. At the same year, our 304SS faucet also was approved by Australia Watermark standard.
-  Watermark certificate (Australia)  
AS/NZS 3718 LK:WMKA21226  
SAT Global
- 2008** Sento products were approved by different countries certifications in this year, such as CUPC/UPC and SGS in US, KIWA in NL, EN817 in North Euro and HK WARS testing, and pushed out the products to the world markets at the same year.
- 2009** Cooperating with Danish national designer – Jacob Jensen, combining the European design with Chinese manufacturer, using the 304SS material to produce the perfect design, as a result developing and producing Phoenix series products.
- 2011** Sento Hunan Industrial Park which covered an area of 100 acres had started, Sento was named "Most innovative brand" at the same year.
- 2012** Cooperating with Swedish international designer –Mr. Anders Kristiansson and Sento is the first 304SS manufacturer who awarded the "China top 100 kitchen and bathroom sanitary enterprise"
- 2013** SENTOUSA,LLC was set up in California, USA to offer better service to customers in North America.
- 2014** SENTO AU PTY LTD was founded in Queensland,Australia in March.
- 2015** The second phase of plant has completed and is ready for rapidly growing market demand.
- 2016** 2016: March 9, Hunan Sento Stainless Steel Sanitary Ware Co., hosted the fourth meeting of the working group drafting "faucet" the national standard. Start the enterprise shareholding system reform, prepare for listing.
- 2017** SENTO have been become one of the biggest manufacturer of stainless steel 304 filter faucet in China. The capacity of 2017 is up to 1100000 pcs.
- 2018** SENTO successfully update ISO 9001 Quality Management System.
- 2019** SENTO add many new products into American cUPC certification,Australian WATERMARK certification. They all pass the testings and factory inspections,succesfully get certifications approval.
- 2020** SENTO open new factory at Kaiping city,Guangdong province,which the place have the matured sanitary industry chain.It optimize our manufacturing structure.And provide better service for our customers.
- 2021** Coming soon...

## TECHNICAL PROCESS

### Raw Material

We are extremely strict on choosing raw material, well chosen Stainless steel 304. Comparing to normal Brass material of brass faucet, Stainless steel has better anti-corrosion, anti hot, hardness with low temper and lead-contained even 0, which is medical and food grade certificated by nationality., Sento raw material testing centre will inspect the raw material everyday, ensure the material is high quality stainless steel rate, quality controlling of Sento Faucet at the very beginning;

### Wax Injection

Using low-temper wax to make wax mould, high accurate rate;

### Wax Amending

Wax inspected 100%, trained workers of Sento clean, amending gap, burr and rust of wax mould one by one ensure it's shining of the surface;

### Wax welding

Weld the wax parts neatly and evenly. When welding, avoid miss-welding and remaining protrusion.

### Sand adhesiving

Using the high quality sand which imported from the west coast of Australia, efficiently ensure the smooth and fineness of the surface of casting pieces, keeping wax mould air-dry 72 hours on the constant temperature and humidity dry room.

### Melting Wax

Insisting on the philosophy of health and environmental and acting it in every process;  
Recycling the wax on Melting wax process.

### Casting

1600' high temperature casting, ensure compactness and stableness of the casting pieces Sento is the only one which has the precise casting manufacturing line on the stainless steel faucet industry; All stainless steel, from every detail to act the Sento brand philosophy of "quality first, followed by cost".

### Cutting

Exquisite industrialize manufacturing, ensure the quality and accurate of casting piece achieving the worldwide level.

### Machining

Overcome the difficult of the hardness of stainless steel during production to fit

the requirements of the size tolerance and surface manufacturing.  
The thread processing requirement meets standard Gb18145.

### Polishing

Stainless steel faucet doesn't need chrome plating, no light pollution. Workers who have more than 10 years of polishing experience polish the fine and smooth surface all by hands.  
Sento stainless steel faucet lost the rough from this process bring its natural color.

### Welding

Ensure the connection has better anti-corrosion and welding

### Treatment of inner surface

Clean the oil and impurities inside the innder surface through passivation cleaning process of 14 ultrasonic waves  
to make sure the components of the products meet all requirements of food grade.

### Assembly

Characteristic customized jigs and fixtures, professional assembly production line.  
Using world famous brand components like German CeramTec & Fluehs cartridges, Hungarian Kerox cartridge which offering durable lifetime and comfortable hand feelings.  
The Helvetic Neoperl aerator brings soft water flow, it avoids water splashing and save as much as 30% water.

### Water testing

Ensure the consumer to buy every single Sento Stainless steel faucet with perfect quality, we use 8.5KGS water press & 3.5KGS air press on the last manufacturing process which is strict according to the water testing stander of USA, EUROPEAN and AUSTRALIA, , ensure 100% water testing of every single faucet before shipment.  
To ensure consumer would buy every single Sento faucet with perfect quality, we 100% test the faucet under 8.5KGS water press & 3.5KGS air press according to USA/Europe/Australia standards before delivery.

Sento's promise against quality is not just a simple combination of specifications and standards, but every small detail on the product. Sento tries to make every product not only meeting with standards but even surpass the standards, we want every customer gains amazing experience during usage.

- 1 Original brush finished are durable
- 2 Lead- free, heathy and no pollution
- 3 304SS material, No Rusty
- 4 Precise casting with smooth inside sides.

Every day, SENTO raw material testing center will do inspection for all the raw material, to ensure raw material of products conform to different standards.

Lead is the only element which do not be required by our body. Lead in blood will lead to sensory function disorder, lower physical skills, and cause various diseases.

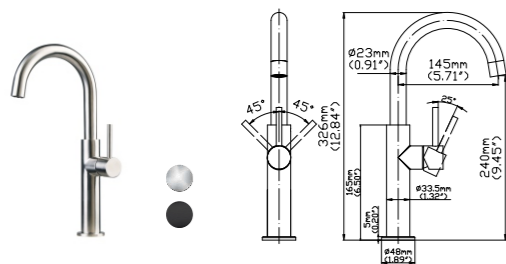

Stainless Steel does not rust is decided by its internal basic chromium element, when its chromium content reached 12%, stainless steel will rapidly produce a layer of passivation to prevent its rust.

## CUSTOMER SERVICE

**SENTO** ,can offer professional ,fast,reliable,pre-sales and after-sales service for customers.  
**SENTO** not only sale good quality products to customer,but also provide the following warranty:

1. 12years guarantee for faucet body.
2. 5years guarantee for components and parts.

## AFTER SALES SERVICE AND MAINTAIN

**1.**All of **SENTO** products meet the standard GB18145-2003,and make the following promise for all the customers who buy **SENTO** faucets:12years guarantee for steel faucet body;5years guarantee for components and parts.On normal using and maintaining situation,if the faucet have damaged or leaking by quality problems,,**SENTO** will repair the faucets or change new components.

### **Note:**

The following situations are not our promise scope:

Use the components not from **SENTO**

The damaged caused by plumbers incautiously installing.

The damaged caused by improperly using ,or improperly repairing .

### **2.Cleaning and maintain**

Don't use strong acid or strong base to clean faucets.

Often clean the faucets.You can put some toothpaste on the surface of faucets,and use toothbrush to wipe and use water to clean them.Then use peel of orange to wipe the faucets surface.Finally,the faucets are new again.

**Tips:**you also can use scouring pad with little cleanser essence to wipe the faucets,then use water to clean.The faucets also looks new again.
